Step 3

Step 4

Step 5

Step 6

Step 7

Step 8

⚠ As usual, don't over-tighten ;-)

ⓘ These are specialty 'plastite' screws that resist vibrations. Tightening too much will only damage your parts.

Step 9 — It's done!

Step 10 — ↪ Install the Left Filament Fan

Step 11

electronics 'dogbone' stand-offs

spare parts

- M3x12

Step 12

- M3x12

Step 13

⚠ Do NOT over-tighten.

- There's absolutely no need to tighten the screw with all your force. You could **break your fan mount** or even **pull out the brass** threaded insert from the x carriage.
- The springiness of the part will provide some pressure to resist vibrations, but **only if you do not over-tighten** the screw.
- (M3x12)

Step 14

Step 15

⚠ Leave the zip tie a bit **loose**. The wire should be able to **slide**.

Step 16 — It's done!

Step 17 — ↳ Prep the Z Probe

Step 18
