INTRODUCTION

[video: https://youtu.be/-Xzc08ppAQU]

This document was generated on 2021-12-26 05:42:11 PM (MST).
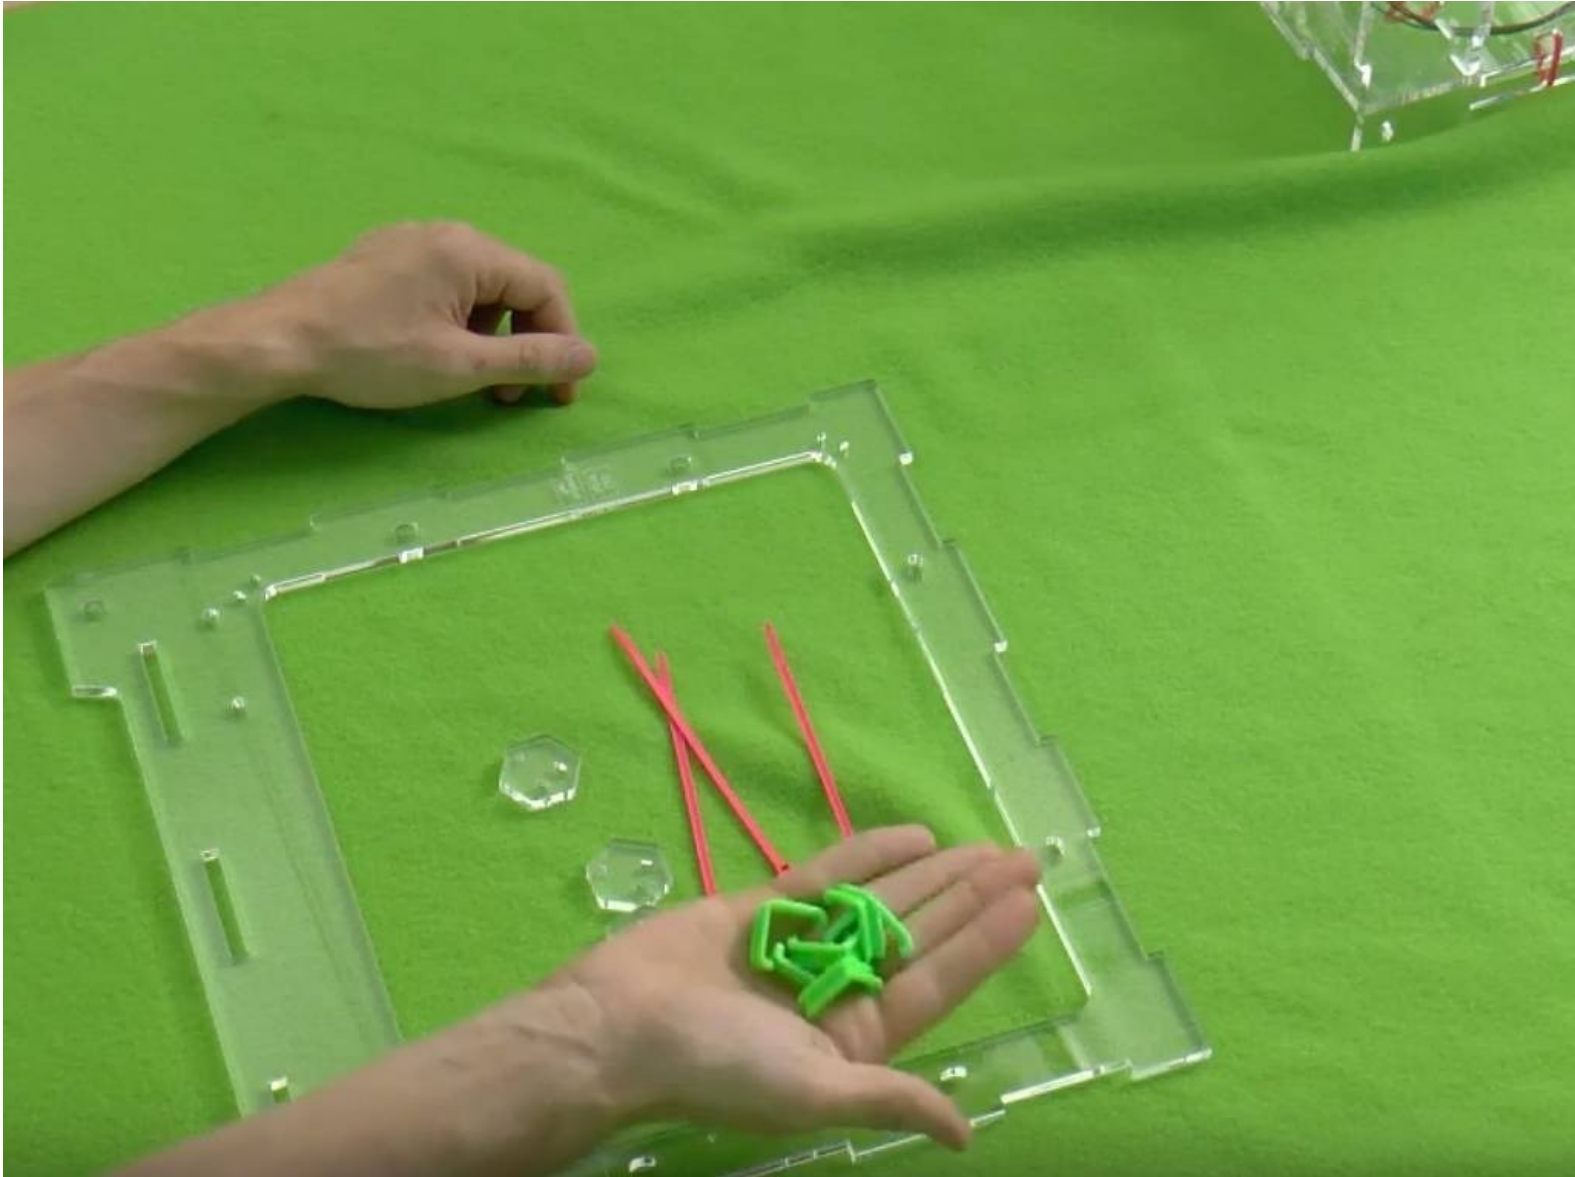

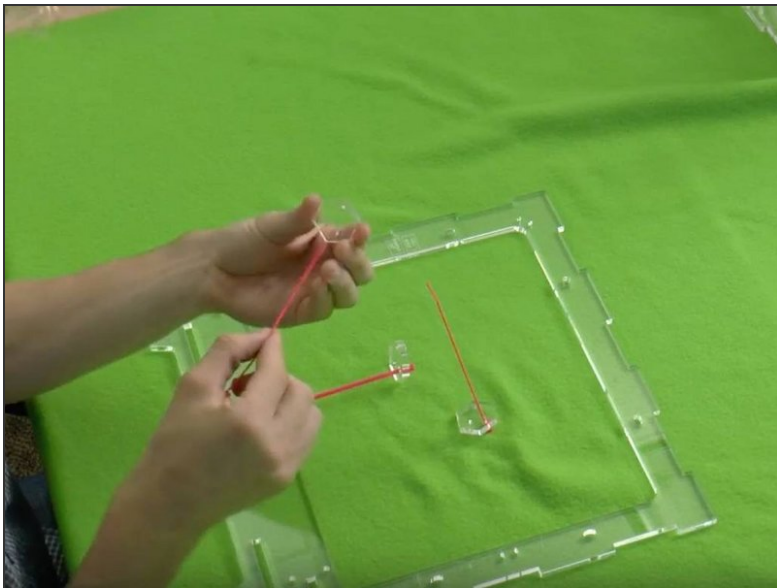

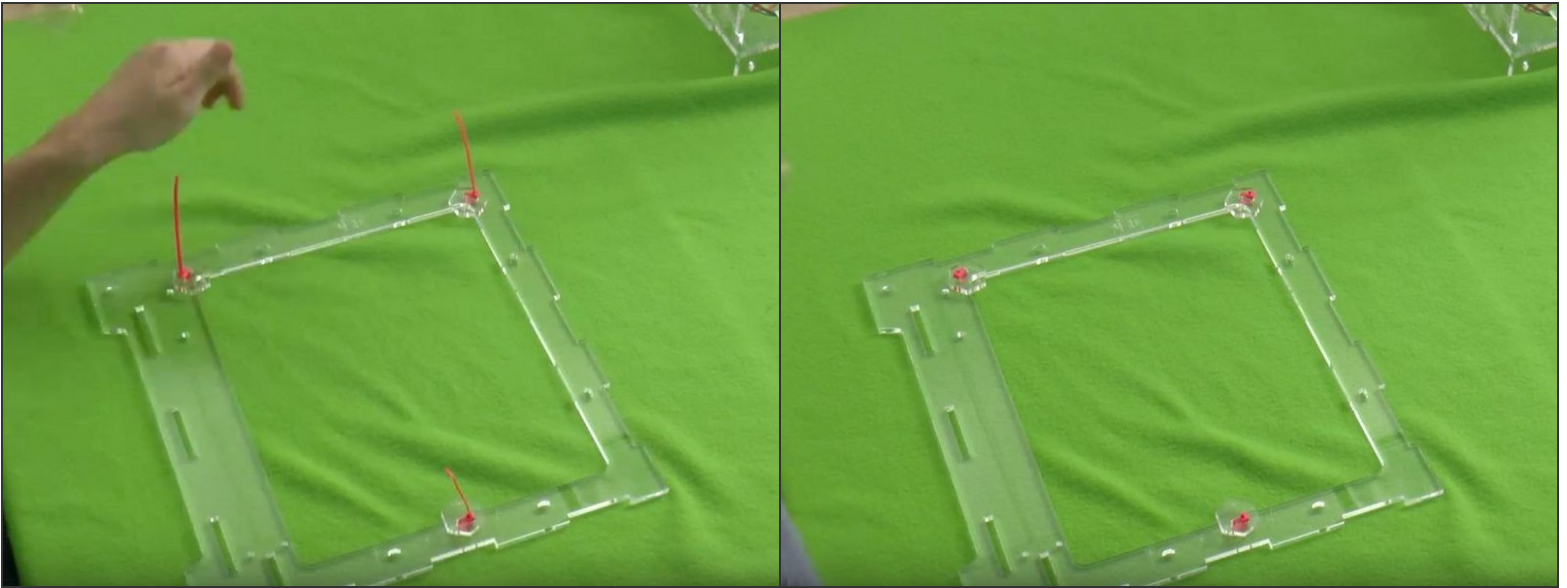

Step 1 — You'll Need:
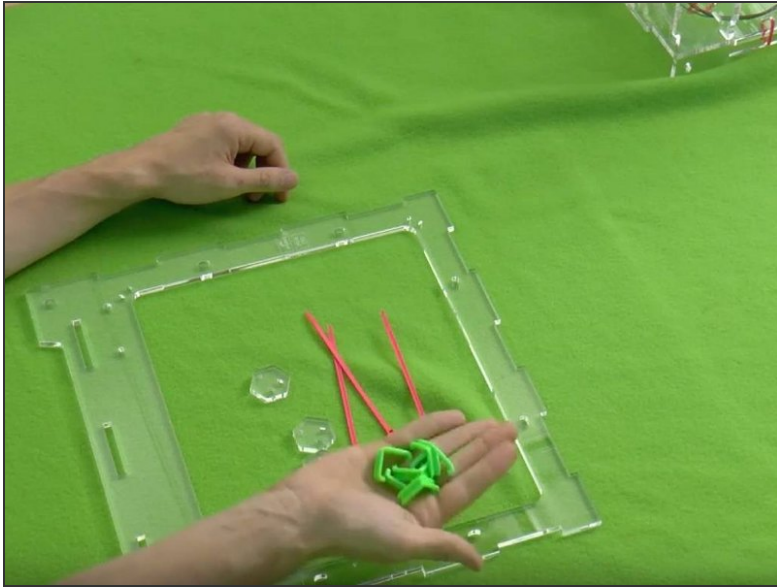

- Back acrylic piece

- Hexagonal acrylic mounts (3)

- 6" zip ties (9)

- Corner clips (6)

Step 2 — Prepare the Hexagonal Mounts

- Thread a 6" zip tie through each hexagonal mount.

- (The toothy part of the zip tie should be facing the center point of the hexagonal piece.)

Step 3 — Attach the Hexagonal Mounts

- Critical The etchings on the back piece should be on the side facing you; that is, the text should look mirrored.

- Attach the hexagonal mounts on top of the back with the zip ties.

- Two mounts go on the left: at the top and bottom.

- One mount goes at the right.

Step 4 — Connect the Back Panel

- Use the six corner clips to attach the back panel to the box.

Step 5 — Secure the Panel
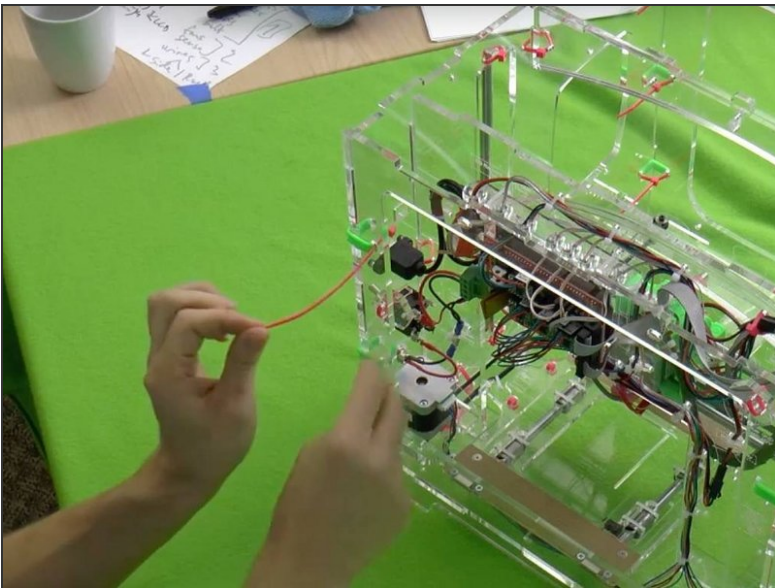

- Use the last six 6" zip ties to fix the back in place.

- Tip: Thread the ties towards you first will make it easier to tighten them.

Step 6 — Beware of the Knob

- Be careful of this knob when rotating the printer on its front for easier access.

- If it gets pushed in, it won't turn properly; to remedy this simply pull it out again with vise grip.
